CAD/CAM at its best: two events in Turkey

Those attending the “3rd Digital Dentistry Symposium” in the heart of Istanbul, overlooking the Bosphorus, enjoyed talks and workshops from the most prestigious international CEREC experts. Recently, the new CAD/CAM production unit inLab MC X5 was also launched in Turkey with a spectacular event on the Sapphire Rooftop, which happens to be the highest point in Istanbul.

Salzburg, November 2014. Recently, Sirona, the world market leader for dental CAD/CAM systems, organized two events for dentists and dental technicians from Turkey and around the world and invited them to Istanbul. First, the “Digital Dentistry Symposium” November 14th-16th took place in the well-known Hilton Bomonti Hotel & Conference Center in Istanbul. It was the third time that this international digital dentistry convention has taken place. Participants had the opportunity to learn about the latest trends and developments from the world of digital technology during talks from renowned CEREC experts. “At the Digital Dentistry Symposium expert users and those who are new to digital technology come together. Once again we had a number of top-class speakers at this event,” explained Baris Akalin, Sales Manager CAD/CAM Systems at Sirona Turkey. “Digital vs. conventional dentistry” was the title of this year’s opening lecture by Prof. Selim Pamuk, president of the Turkish Academy of Esthetic Dentistry and one of the most well-known dentists in Turkey. In other lectures, international experts shared their experiences and presented the latest technologies, discussed topical questions on digital dentistry and identified perspectives for the future.

The new inLab MC X5: launched in Turkey with a great view

Can Tolay and Baris Akalin have presented the new inLab MC X5 in Istanbul in November, for the first time in Turkey. The evening took place at the Sapphire Rooftop, which happens to be the highest point in Istanbul. A great view for Sironas new grinding and milling machine and the audience. Dental technician and inLab betatester Bastian Heinloth from Germany did a live product demonstration and hands-on on the brand new milling unit. He gave a further introduction into Sirona's inLab product portfolio and presented the benefits for dental laboratories provided by the Sirona Connect system. The participants enjoyed a nice evening with a spectacular view all over the beautiful city of Istanbul, attended a digital Istanbul-tour by helicopter in a 5D cinema and had the opportunity to at the same time get in touch with the new inLab MC X5.
