SIRODEM*

Cost-effective solution for water treatment.

Fully desalinated water. For laboratories and dental/medical practices.

Why purchase expensive distilled water?

The SIRODEM water treatment system allows you to produce purified water simply and at low cost.

Product advantages

Economical

- You save up to 80 % compared with bought-in water

Reliable water quality

- Constant water quality. No deterioration quality through storage.

Geared to your individual requirements

-

You produce only the quantities of water you really need. Large-capacity cartridge needs replacing only at infrequent intervals

Reliable

-

No more malfunctions – no more unnecessary interruptions. Autoclaves and instruments last longer.

Clean instruments

-

No corrosion, pitting or stains on the instruments

Standard equipment

-

Conductivity meter (analogue), measuring range 0 – 50 S/cm

- Cartridge filled with high-quality resins
- Untreated water hose 3/4"
- Purified water hose 3/4"
- Wall-mounting bracket
- Recommended quality
